Did you know that Aidacare offers a comprehensive range of equipment for rent?
We’ve got you covered should you need any products for home care and recovery!

### Manual Handling

Poor manual handling practices can cause injuries to the body that affect the musculoskeletal and/or nervous systems.

The most commonly injured part of the body is the back, followed by the shoulder, arm, hand and neck. But these injuries are preventable. To understand how, we have put together this guide which helps you identify the equipment you need to eliminate the risks of injury.

For the full range of products, please contact our experienced and friendly staff at Aidacare.
