**Lifecomfort Pressure Reducing Foam Mattress**
- Four layer design for maximum comfort and support
- A full size memory foam overlay, side walls for extra stability, two way waterproof stretch cover and PVC bottom
- SWL: 150kg

**Lifecomfort Premier Care Foam Mattress**
- Multi-stretch top cover, hinged foam core, mattress rotation with reinforced side walls for patient stability when entering and exiting the bed
- SWL: 250kg

**Aspire Lifecomfort Active Air 4 Mattress Overlay**
- 4” Overlay + Memory Foam
- Simple and easy to operate semi-digital pump
- Welded seams and zip protection, breathable multi-stretch cover and patented cable lock protection
- SWL: 135kg

**Aspire Lifecomfort Active Air 5 Mattress Overlay**
- 5” Overlay + Foam Mattress available in Single and King Single sizes
- Simple and easy to operate digital pump
- Welded seams and zip protection, breathable multi-stretch cover and patented cable lock protection
- SWL: 175kg

**Aspire Lifecomfort Active Air 8 Mattress Replacement**
- 8” Mattress replacement available in Single and King Single sizes
- Simple and easy to operate digital pump
- Welded seams and zip protection, breathable multi-stretch cover and patented cable lock protection
- SWL: 200kg

**Aspire Lifecomfort Hybrid Mattress Systems**
- Intelligent Hose Management - when not in use the air-hose can be stored internally, reducing infection control and OH&S issues.
- Optimised Heel Protection - a 12° tapered heel zone redistributes pressure up the lower leg, away from the vulnerable heel region. The castellated surface collapses in a wave-like movement reducing shear.
- Integrated Shear Reduction - the memory foam overlay moves independently of the underlying cells, reducing shear as the bed profiles.
- Memory Foam Top Layer - integrated memory foam overlay improves immersion, envelopment and comfort.
- SWL: 180kg

**Convoluted Foam Overlay**
- Fits under bed sheet to re-distribute pressure points
- Improves air flow to maintain constant body temperature
- SWL: 300kg
**BEDROOM**

**Adjustable Backrest Support**
- Sitting upright in bed
- The angle of the frame can be easily adjusted
  
  BEA009900 - Backrest
  BEA014700 - Pillow

- Excellent indoor and outdoor manoeuvrability and stability
- Weight activated push down brakes
- 7” Wheels
- SWL: 130kg
  WAF705600RE • Red
  WAF705600BL • Blue

Aspire Seat Walker XL
- Ideal option for the larger user
- Curved and padded backrest offers comfortable seated support and flips up/removes easily for folding/storage
- 8” Wheels
- Max. User Weight: 180kg
  WAF750020SL • Silver

Aspire Walking Tutor - Heavy Duty w/Hand Brakes
- Height and depth adjustable contoured forearm pads
- Swivel front wheels for advanced manoeuvrability and control
- Soft, padded, rubber moulded contoured forearm pads
- Sturdy and lightweight aluminium frame provides stability and support for users up to 180kg
- Foldable frame for trouble-free storage and transportation
  WAF699200
**MOBILITY & ACCESS**

**Aspire Tri Wheel Walker**
- Three wheel walker ideal for use in combined spaces
- Folds away for easy storage or transportation
- Height adjustable handles to suit user requirements
- Handbrakes are lockable for stability while standing

**Aspire Knee Walker**
- For lower leg & ankle injuries
- Compact & easy to fold
- Multi-height adjustable platform
- Adjustable handle bar height
- Dual locking brakes

**Aspire Meal Tray Walker**
- Sturdy & robust walking aid for use within the home
- Lockable hand brakes provide additional safety when rising from a seated position
- Clip on plastic trays with outer lip edge to capture spillage and prevent items from slipping off

**Aspire Meal Trolley**
- Sturdy and robust, providing a means of transporting meals or other items from one room to another
- 3" castors with two locking to hold the trolley in place
- Clip on plastic trays with outer lip edge to capture spillage and prevent items from slipping off

**Side Folding Walking Frame - Aluminium**
- Lightweight walking frame making it ideal for indoor use
- Folds flat for easy transportation and storage
- Height Adjustable (760mm - 940mm)

**Folding Frame - Aluminium**
- Provide support for users with limited mobility
- Height adjustable, aluminium folding frame for ease of transportation and storage
- Lightweight and ideal for indoor use

**Forearm Crutches**
- Cuff provides secure fitting to the forearm
- Adjustable between cuff, handle and ground
- Also available an ergonomic shaped handle

**Underarm Crutches**
- Patented clip-lock adjustable handle and push button foot pieces for fast, precise measuring and fitting

**Walking Sticks**
- A range of walking sticks available for all users
- Lightweight, Folding, Adjustable, Quadbase, Swan Neck

**Transport Ramp**
- Lightweight composite fibre core and aluminium frame support up to 400kg
- Anti-slip all weather surface, raised tapered side walls
- Folding design for easy transport and storage

**Rubber Ferrules / Cane Tips**
- A range of colours and sizes to suit, from 12.5mm to 25mm

**Multipurpose Ramp 870mm**
- Longer, wider variant of the Personal, designed for commercial and travel situations
- Folds up to allow for easy storing or transporting
- Comes with strap for storage on back of wheelchair
- Length: 870mm
- Width: 835mm

**EBL Ramps**
- Ramp has the added security of edge barriers
- The EBL Ramp is available in the following lengths: 900mm, 1200mm, 1350mm, 1650mm, 2000mm, 2500mm and 3000mm
- Available widths: 750mm and 820mm

## ARTHRITIS

Living with Arthritis can be uncomfortable and painful. You may experience stiffness, inflammation and damage to the cartilage in your joints resulting in weakness, instability, reduced range of movement and joint deformities. There are over 100 forms of arthritis that can affect people of all ages.

Arthritis can heavily impact on daily function including the most basic of tasks such as preparing meals, walking around the home, driving, tying laces and button up shirts. Fortunately, there is a wide range of equipment available to assist with daily tasks to allow you to maintain an independent lifestyle whilst living with arthritis.

## POST STROKE

A stroke occurs when the blood supply to the brain is interrupted. This interruption can be caused by a burst of an artery or a blockage, which then fails to supply the brain with sufficient oxygen and nutrients, therefore causing brain cells to die. It is important to seek immediate medical advice and engage in a post-stroke rehabilitation program. These programs are designed to promote recovery of partially damaged brain cells and retrain skills that were affected. Depending on the severity of the stroke, some brain cells may not be repaired and long term functional implications may be present.

With the use of innovative adaptive equipment, assistive devices and daily living aids, a stroke sufferer has an opportunity to maintain as much of their independence as possible to lead an empowered and healthy lifestyle.

FALLS PREVENTION

Falls are more likely to occur in older people and can result in injuries such as hip and wrist fractures, dislocations, sprains, head injuries, abrasions and bruising.

The cause for falls varies depending on age, medical history, cognitive impairment, low weight, gait disorders or environmental hazards to name a few.

It is important to implement preventative measures to decrease the chances of a fall particularly for those who are identified to be at high risk. Such measures can include installing grab rails and safety equipment in wet areas, mobility aids and hip protectors, and removing clutter and other hazardous items around clearance spaces within the home.

Please ask us for any product application guides you’d like to see.
Product suggestions to suit your condition

**BARIATRIC**

*Obesity is an increasing issue in our population posing a demand for equipment in larger configurations. Aidacare, in conjunction with AusBIG, states that a bariatric client may have one or more of the following characteristics:*

- Weigh more than 125kg
- BMI of over 35
- Seat width of over 50cm

Bariatric equipment is designed to assist in pressure management, heat management of the client and effective weight distribution on the seating surface.

Aidacare’s bariatric equipment range caters for all functional needs including mobility, community access, self-care, bedding, posture & seating and aids for daily living.

**MOBILITY & ACCESS**

Access and mobility are issues that touch everyone’s life at one time or another.

Many people experience reduced mobility in various situations including young people with sporting injuries, older people with less agility or people with disability. It is therefore crucial to acknowledge that the entire community benefits from a more accessible environment.

This overview was put together to give you an overview of the mobility equipment that can help you overcome the obstacles you might face.

### Carer’s Support

Manual handling is any activity that requires the use of force exerted by a person to lift, carry, lower, push, pull, move or hold any item, including a person. It also includes work involving repetitive activities, sustained muscle exertion and fixed postures.

Injuries in health, aged care, rehabilitation and disability services due to the handling of people are a major risk. Poor manual handling practices can cause injuries to the body that affect the musculoskeletal and/or nervous systems. The most commonly injured part of the body is the back, followed by the shoulder, arm, hand and neck. But these injuries are preventable.

To understand how, we have put together this guide which helps you identify the equipment you need to eliminate the risks of injury.

### Pressure Care

Pressure injuries can develop in anyone with reduced mobility. They commonly occur when there is prolonged pressure on bony prominences such as the elbow, heel, shoulder, back of head, lower back and the buttock area. If left untreated, pressure injuries can lead to serious complications. Therefore, prevention is key to managing areas at risk of a pressure injury. Prevention tips include regular changes to position, good hygiene and skin care, and a healthy diet.

Please ask us for any product application guides you’d like to see.
Dementia can happen to anybody, but the risk increases with age. It affects thinking, behaviour and the ability to perform everyday tasks.

Some early signs of dementia include progressive and frequent memory loss, confusion, apathy and withdrawal.

Safety within the home is an important factor to consider when caring for a person with dementia.

The home environment should help them know where they are and to find where they want to go. This can be done with large orientation signs and using colour contrast to highlight important items or areas in the home.

After an injury, it is important to engage in a rehabilitation program designed by your Physiotherapist, Exercise Physiologist, Occupational Therapist or other relevant discipline. These programs will include a home based component which play a crucial role in the recovery process and can help you get back to participating in your favourite activities more quickly. Aidacare’s therapy and exercise range provides you with the equipment you need to manage and maintain your physical rehabilitation needs in the home. Discuss with your relevant health professional for the most appropriate items for your needs.
Complex Rehab is the supply of rehabilitation equipment in highly individualised formats prescribed by the therapist for the end user.

Aidacare’s specialist Complex Rehab staff include Rehab Engineers, Occupational and Physio Therapists and a group of professional Equipment Advisors. They ensure that each Aidacare customer is able to be matched with the right Complex Rehab solution.

Complex Rehab includes specialised manual and powered wheelchairs, seating and positioning products, specialised pressure management cushions, children’s rehabilitation equipment and any other equipment that needs to be specially selected, prescribed, sized and fitted.
