

Solaris - Caresia - Bandage Liners

- Caresia standard sized bandage liners simplify complex multi-layered bandaging protocols by replacing and improving upon foam liners, stockinette, and gauze
- Caresia over-wrapping is more comfortable and effective than standard bandaging during the active phase of therapy
- The unique foam chips used in every Caresia garment help resolve tissue induration, stimulate interstitial fluid movement, and diffuse irregular wrapping pressures

✓ Contracted DVA product

✓ Contract approved
