

## Jenx Corner Seat

Corner Seat by Jenx is an adjustable floor based seating system for infants and young children. It offers support in long sitting, which is children's usual first sitting position. It is a bright and comfortable ideal first seat for any child. It can also be used in conjunction with the Jenx Nursery Table for activities and mealtimes.

- Includes an adjustable back height and can be used with or without the upper back support. An Abduction Block is also included to help keep the child positioned correctly; placing their hips neatly into the back of the seat.
- Midline positioning is maintained by the corner design of the system and, if you prefer to have a flat back with wings at the side, there are small Triangular Cushions available to place at the back to provide this setting.
- The sturdy 'wings' and corner design help to maintain symmetry of a child's spine.
- A simple first seat to introduce children to floor sitting. Long-leg sitting helps to maintain the length of the muscles behind the knee.
- A simple first seat to introduce children to floor sitting. Long-leg sitting helps to maintain the length of the muscles behind the knee.
- Adjustable upper support can be used to support the head or shoulders.
- Available in a range of 5 vibrant colours to choose from: Blue, Red, Pink, Grey & Green
- Total Back Support Height: 440 mm - 620 mm
- Lower Back Support Height: 235 mm
- Hip Width: 390 mm
