

Firefly UpSee Walking Support

- The Upsee is a mobility harness designed to allow children with motor impairment to stand and move with the help of an adult
- It lets children experience the benefits of upright movement, and creates the possibility of social and emotional development by letting children interact with their peers at eye-level
- It can be used to work on a variety of mobility and ability skills, from weight-bearing and walking, to improving head control
- It helps remove social barriers linked with disability that restricts a child's level of participation and functioning
- When your child is motivated to explore and move and weight-bear, it creates a real possibility for long-term development
- The Upsee kit is made up of three parts: an adult hip-belt, a child harness and shared sandals
