

JAY GO Cushion

JAY[®]

Soft and water-resistant wheelchair cushion for comfort and convenience

The JAY[®] GO wheelchair cushion is a soft, mildly contoured, dual-layered foam cushion with a Dartex[®] moisture resistant cover designed for the client at low risk of skin breakdown who requires mild stability.

- **Mildly Contoured, Dual-Layered Foam Base** The GO cushion's dual layer foam construction features a firm bottom layer to provide a stable base of support, and a soft top layer to maximize comfort and increase sitting tolerance. Mild contouring provides additional support.
- **Dartex[®]-Coated Lycra[®] Cover** A four-way stretch Lycra wheelchair seating cover reduces surface tension, allowing the client to fully experience the softness of the GO's foam. Coated with Dartex, this durable cover is water-resistant so it is easy to wipe off and clean. An Aqua-guard zipper and anti-wicking thread protect the foam from fluids to maximize the life of the cushion.
