

Paediatric Sorrento Chair

The Kidz Sorrento lends itself easily to changing user needs and is above all else the ultimate in comfort for children with complex medical conditions. It is a simple to operate and functional chair which is designed to improve and maximise comfort as well as provide postural support and pressure management.

- **Tilt in space to allow for re-positioning** for pressure care and comfort of the user. Elevating leg rest and recline are also standard
- **Dartex multi stretch pressure management materials** throughout all patient contact surfaces. This material is breathable with moisture permeability to ensure that the surface remains dry and comfortable for the user. This material can be wiped down for infection control and hygiene requirements
- **Medium to high pressure management cushion, using memory foam.** This cushion is removable for cleaning and if you wish to use a different type. An advantage of our memory foam cushions is they do not require maintenance or adjustment for each person, unlike a gel or air cushion. The cushion is also easily replaceable
- **Adjustable seat width, foot plate height and seat depth** allows the chair to fit the size and requirements of the user
- Suitable For These Conditions:
 - Cerebral palsy
 - Spina bifida
 - Spinal cord injury
 - Muscular dystrophy
- Main Uses:
 - **NDIS/Home Care – Care Facilities:** Suitable for highly dependent patients with the most complex level of care required
 - **Hospital:** Useful for those in high dependency wards at risk of pressure injury. Eg; HDU ward, surgical wards, general medical wards,
