

TiLite Aero Z

permobil

TiLite

- Open frame. Open road: The open frame of the aluminium Aero Z calls out to the open road
- The Aero Z is the only TiFit, mono-tube aluminium frame on the market. In a class by itself, the Aero Z is lightweight and fully adjustable and it won't break the bank!
- Rigid Mono-Tube frame chairs are the lightest and highest performing chairs because they are constructed from the fewest possible components and have the fewest moving parts. Precision Lock technology from Permobil is the most intuitive and easy-to-use adjustment system on the market
- Precision Lock Caster reduces complexity and the number of steps required for adjustment. Your chair can now be adjusted in a matter of minutes
- Precision Lock Back offers infinite possibilities for an exact fit each and every time. Critical adjustments can now be made while the user remains in the chair, saving time and reducing inconvenience
- Distinguished by a clean, modern look, the mono-tube frame's 1.25" tubing gives the Aero Z strength and durability. The frame shape affords excellent transportability and easy placement on a car seat
- The Ergonomic Advantage means an additional unique bend in the frame creating an ergonomic seat slope sitting you lower in the chair providing greater pelvic stability and improved posture through optimal contouring
- Zero Play Camber Plugs give a much tighter feel to the chair like sport suspension in a car. CNC machined from billet aluminium to the highest tolerances, they remove any side to side movement from the rear wheels
