

TiLite Aero X

permobil

TiLite

- **Multi-faceted simplicity:** The Aero X features an innovative modular design with clean modern lines and configurability. Featuring multiple configurations that include heavy-duty, hemi, and amputee options. Add superior rolling dynamics and full adjustability, and you get an Aero X that excels in both performance and price.
- The modular frame design of the Aero X facilitates configurability in the field. This includes adding aftermarket seating systems, switching fixed and swing away front ends, and growing chair width and/or depth to meet changing customer needs.
- TiLite has taken this standard wheelchair design and added efficiency in both function and manufacturing. Here is a design that is strong, efficient, and cost effective.
- The Tru-Fit system opens up the world of adjustability by incorporating an infinite adjustment mechanism. The Tru-Fit system allows you to fine tune the fit of your wheelchair because you are not limited to a series of pre-set holes.
- The Aero X aluminium folding frame is compact, with a fluid, easy-to-use folding mechanism. Side-to-side folding minimises the folding width and maximises ease of transportation.
- Snap-In Seat Saddles lock the cross tubes in place on TiLite's rigid folding mechanism. This feature helps the Aero X achieve rigid chair performance.
