

## SureSafeGO Anywhere 4GX Personal Alarm

**Protection Anytime, Anywhere** SureSafeGO 4GX is a fully mobile personal medical alarm designed for vulnerable people who are prone to falls. Whether you are at home, taking a walk or at the shops, SureSafeGO 4GX ensures your safety and well-being is just a button press away.

- If you wish to make a purchase please use payment form [View quick checkout form](#)
- **Automatic Fall detection** Many alarms on the market will only activate if the button is pressed, but the SureSafeGO has an automatic fall detector that senses a fall and activates the alarm.
- **GPS Find Me Function** Quickly finds where the pendant is located by sending a PING request. This is an incredibly handy function for people who wander and get lost easily.
- **SOS two way communication 'talking Pendant'** If you press the SOS on the pendant, it will activate a voice call and send its location to 5 emergency contacts via google maps link. You can then talk into the pendant to provide more details of your situation.
- **Long Life Battery Standby** Depending on the use of the battery, the SureSafeGO 'Anywhere' personal medical alarm will last approximately 2-4 days depending on use.
- **Charging Cradle** The hyper charging cradle will re-power the device to full power in about 1 hour.
- **Showerproof** Rated IP68 for use in the shower, when needed the alarm can contact family and friends in the event of a fall or a serious medical event.
- Uses mobile phone technology via a 4GX Telstra SIM card, no landline connection required. Choose your own SIM or let us organise one for you.

- The device is ready to use straight out of the box, providing instant coverage once set up and activated
