

## Bellman Visit Wrist Receiver

**Bellman Wrist Receiver** Connect your Bellman Visit System and receive important alerts directly on your wrist. The Wrist Receiver notifies you through gentle vibrations when key events occur, such as when the doorbell rings, the phone sounds, your baby needs attention, or a smoke alarm is activated. Ideal for individuals who are deaf, hard of hearing, or in noisy environments. (Requires Bellman Visit Bridge and compatible Bellman Visit Transmitters.)

- **Wireless Alerts:** Receive vibration notifications for events like doorbell rings, phone calls, baby monitoring, or fire alarms.
- **Smart Connectivity:** Works as part of the Bellman Visit Smart Home System to ensure full-home awareness and safety.
- **Wearable Design:** Lightweight and comfortable wristband allows you to stay connected and mobile at all times.
- **Bridge Integration:** Requires the Bellman Visit Bridge for connection between transmitters and the wrist receiver.
- **Customizable Notifications:** Configure alerts for multiple transmitters including door, baby cry, smoke, and phone sensors.
- **Reliable Vibration Alerts:** Strong vibration patterns ensure you don't miss any important signals.
- **Mobile App Compatible:** Connects to the Bellman Mobile App for enhanced functionality and remote alerts.
- **System Expansion:** Can integrate with a wide range of Bellman Visit transmitters for a complete alerting system.
- **Simple Operation:** Easy setup process and intuitive use for all ages.
- **The Bellman Wrist Receiver:** Provides reliable, discreet, and wearable alerts for your home. Combined with the Bellman Visit Bridge and compatible transmitters, it ensures you never miss important events—whether it's a visitor, a phone call, or a safety alarm.

**How It Works:** When a Bellman Visit Transmitter is activated—for example, when the doorbell rings—the signal is sent to the Bellman Visit Bridge. The Bridge then sends a wireless alert to your Wrist Receiver and the Bellman Mobile App. Your Wrist Receiver vibrates to inform you of the event, helping you stay connected wherever you are in your home.

**Tailor It to Your Needs:** The Bellman Visit System can be expanded with different transmitters to match your lifestyle and safety requirements.

- **Smoke Alerts:** Receive emergency notifications from connected smoke detectors.
- **Door Alerts:** Get vibration alerts when someone rings your doorbell.
- **Baby Monitoring:** Be notified when your baby needs attention via the baby cry transmitter.
- **Phone Alerts:** Get notified of incoming calls or messages on your Wrist Receiver through the mobile app.
