

Eluma Digital Smart Cloud Clock

Eluma Digital Smart Cloud Clock is designed for dementia, Alzheimer's, memory loss, visually impaired and elderly people. It comes with clock, alarm, to-do, weather, messages, photos, settings and mobile App control functions.

- Digital & Analog clock display - User can switch between different clock styles
- Clock can work independently, or with the TT Clock App in Android or iOS smartphone.
- Auto-Brightness
- Talking clock function: tap to hear current time, date, week, the time of day, alarms, messages etc.
- Unlimited customisable alarms/reminders
- Personalised Alarms: user can choose from 30 + reminders list to set a new alarm quickly
- Agenda / to do list
- Snooze and remind me later function
- Auto daylight saving time
- Live weather and 8 days weather forecast
- Passive mode: can lock the clock settings to prevent the misoperation by the user
- Mobile App control: set & sync alarms/to do list from smartphone and clock; send messages/pictures from smartphone to clock
- Interactive mode: notify the clock app user that the user had completed the reminder, or received the photos.
