

INVISABEAM DIALABEAM Monitor

- INVISABEAM is an early warning monitoring device that gives positive detection for falls prevention
- The ADJUSTABEAM is our most flexible solution, able to monitor beds, chairs and doorways.
- Simple to set and then adjust the beam for any length between 500 and 3000mm with just the push of a button.
- Watch [informational video here](#)
- It can be operated by mains power or rechargeable battery (eliminating wires and leads and providing a trip free environment)
- Supplied with height adjustable stand to allow monitoring even low low beds.
- Can be connected to Nurse Call system, or any of the Invisa-Beam wireless alarm solutions.
