

JAY - J2 Plus Bariatric

- The Jay J2 Plus Cushion offers the bariatric client all the clinical benefits of the Jay J2 Cushion with a weight capacity of 295 kg
- Multiple insert selections: Allow therapists to customize the Jay J2 Plus Cushion. For patients who are at low risk for skin breakdown, both standard and custom foam packages are available. These packages feature layers of Visco foam that stack into the seat-well. For patients at high risk, fluid pad inserts are available
- Cover Choices: Tritex Air-Exchange cover which promotes cool-air movement or an incontinent-resistant low-shear cover that combines the benefits of incontinent resistance and low shear
- Urethane overlay cover: Protection from incontinence is an important feature in a bariatric cushion. The Jay J2 Plus Cushion offers a removable urethane overlay cover to further protect the cushion
- Anterior tilted base: Most Bariatric patients have a problem with slumping forward. This is caused by the downward pull of their stomachs. By providing a slight anterior tilt to the cushion base, the hip angle is opened up enabling patients to sit more upright
