

Leg Support

- The Leg Support is a light-weight foot stool which puts no pressure on the heels
- A blue water-resistant cover is easy to wipe clean, or can be removed and washed. This is good for people with oedema or incontinence issues
- Convoluted foam under the calves
- No pressure on heels
- Helps prevent foot-drop
- Helps prevent oedema
- Light to move or carry
- Feet raised off cold and draughty floors
- Soft foam construction that should not harm patients if they walk into it
