

Aspire Rehab RX Junior Wheelchair

- **The Rehab RX Junior** – is designed for the increased postural support and pressure care of children, via easy repositioning and advanced adjustability
- **Tilt (26°) and backrest recline (30°)** – this facilitates weight re-distribution and the preservation of skin integrity. It also optimises user comfort, decreases user fatigue and assists with head control
- **Highly adjustable** – depth and width adjustable seat sizing. Height adjustable and removable armrests. Adjustable headrest
- **Contoured, built-up backrest and seat cushion** – the backrest has a gentle lumbar build up and moderate lateral supports; together with the abductor and adductor build-up at the seat cushion, midline positioning is optimised
- **Breathability** – support surfaces offer multi-layered foam with breathable multi-stretch covers - for pressure re-distribution, comfort and to enhance skin microclimate
- **Advanced articulating legrests** – closely mimic the normal movement at the knee upon elevation, allowing the thigh to maintain contact with the seating surface, ensuring maximum support and skin contact with the cushion
- **Crash Tested** – to AS/NZ3616.196
- Anti-tippers come as standard
