

Phoenix Chair - Paediatric

- The Paed Phoenix is the most supportive and functional of the Seating Matters chairs for children
- The Paed Phoenix chair provides pressure distribution due to the multi-stretch material and reflex foam in the seat cushion and offers a great deal of support with the tilt in space mechanism and adjustable supports
- The head support accommodates those with kyphotic postures, hyperextension, or those who require upper body and head support
- The angle of the back can be adjusted to accommodate the patient and the elevating legrest can be raised and lowered, also increasing patient comfort
- The tilt in space will allow all angles on the chair to remain the same while tilting the patient back, allowing their weight to be spread throughout the body and reduce pressure on a given point
- The push handle and castors allow the patient to be transported in the chair. It is fully hoist accessible which reduces moving and handling significantly
- The removable arms facilitate width adjustment and also side transfers
- The arm height, seat depth and width as well as the footplate height and angle are all fully adjustable
- Effective for children with: Risk of pressure ulcers, Reduced upper body control, Kyphosis, Scoliosis, Muscle contractures & Swelling
