

## iCare Mattress M2

- The M2 mattress features firm edge support and high-density foams
- This is a high-risk mattress, and suitable for use on all Icare beds
- The M2 Medical Mattress has a wipeable cover with a drip cover and firm edge support
- No turn design reducing manual handling
- XP Light foam is a very responsive and microporous material allowing a high level of airflow. This is used in the top layer of the M2 mattress and is module cut to allow each square to move to body contour. This module cutting also allows for horizontal anti shear movement
- XP Support foam is a high-density foam that is used in the bottom layer and side rails of the M2. XP Support foam is an open cell material that breaths to allow air circulation but is high density to prevent bottoming out or side roll out. This material will easily contour to any profiling bed

 Contract approved

### Warranty Information

- 5 Year Limited Warranty
