

INVISA-BEAM INVISALERT

- INVISALERT is a long range Wireless Pager alarm compatible with ALL Invisa-Beam monitors.
- Has a vibrating and low noise audible alarm
- Each unit can be connected to multiple alarms at one time
- Can be programmed to display the location of the alarm source (bed & room)
- Runs on mains power or cable free via Li-Ion rechargeable battery
- Watch [informational video here](#)
- Allows total wireless handsfree communication with the monitor.
 - When the nurse attends to the patient in response to an alarm:
 - INVISALERT cancels the alarm
 - The bed monitor automatically resets when the nurse leaves the bed.
- Allows the nurse free access to the patient without worrying about switches
- Supports high infection control protocols
