

Bruno Vertical Platform Lift

- **Intuitive Operation:** Drive on/off platform, push pressure-controlled rocker switch to travel up/down. Ramp automatically folds when VPL is in use to create safety barrier.
- **All-Weather Durability:** Weather-resistant controls and specialized coating protect VPL from the elements and enable indoor or outdoor installations. Optional cold weather package available for extreme winter conditions.
- **Reliable Power:** Affordable AC power on 4-6 ft units (optional DC power and continuous charging DC battery-powered motor on 10-ft model).
- **Safe Design:** Unit shuts down when obstruction sensor under platform is touched. Emergency stop switch on platform control panel provides additional peace of mind.
