

Universal Side Bars

- Universal Side Bars are an alternative to Liko's Cross-Bars to achieve a four-point suspension
- The Side Bars are easily attached to and disconnected from a Universal Sling Bar
- When loaded, the Side Bars adapt to the sling, which usually means that they hang somewhat diagonally, thereby providing more space for the patient's shoulders
- In combination with Amputee Sling medium, the Side Bars are an excellent alternative for patients who have undergone hip surgery or people with a limited ability to bend at the hips
- Universal Side Bars are delivered together with a practical storage bag which can be hung on the wall or on a mobile lift

Compliance

AS/NZS ISO 10535:2011

Warranty Information

- 1 year

Code	Display Name	Safe Working Load
