

Quickie Q50 R Carbon Folding Power Wheelchair

Long-haul getaways. Family breaks. The daily commute. Whatever your destination, the Q50 R Carbon is your perfect travelling partner. Weighing a mere 14.5 kg (without batteries) and fabricated from premium carbon fibre, take a load off your mind (and your arms) knowing that this is an effortless powerchair to lift. Foldable in seconds, it stores snugly away in the tightest of places too (and all without removing the battery). Ready to go out? The Q50 R Carbon packs the robust, reliable QUICKIE performance to get you from A-B (or even A-Z, thanks to its extended 24 km range). And with 5 eye-catching accent colours, you'll bring a touch of style to wherever you go too.

- 14.5 kg carbon design: Carbon fibre. Light, but incredibly strong. In fact, some of the lightest things on Earth are made of it, including the Q50 R Carbon - one of the world's lightest carbon folding powerchairs. Completely alluring. Completely arresting. And weighing just 14.5 kg, its shock value is more than skin deep.
- Travels in spaces (and to places) other powerchairs can't: Vacation without a bulky powerchair? The Q50 R Carbon folds so ridiculously compact when folded (370 mm length x 570 mm width x 767 mm height), it can fit just about anywhere!
- Approved for air travel: Are you planning to travel internationally? You can take the Q50 R Carbon with you since its Lithium-Ion battery is approved by IATA (International Air Transport Association) for transportation on aircraft.
- Light on weight, heavy on reliability: For over 40 years, we've been working alongside world class manufacturers to deliver solidly built powerchairs that have the very-best driving performance, motors, range, and reliability that others just can't match. That's why the Q50 R Carbon's 250W high efficiency brushless motors provide the power and reliability you need from your powerchair (including climbing obstacles of up to 40 mm).

- Go further with an extended range of 24 km: Prefer to leave the car at home? Enjoy a range of up to 12 km with the Q50 R Carbon's 10Ah lithium-Ion battery. If you're looking to go further, its additional battery slot allows you to bring an (optional) second battery along for the ride too, doubling your range to up to 24 km!
