

TiLite TRA

permobil

TiLite

- **Roll better, live better:** With the power and style of its titanium dual-tube frame, TiFit precision, and full adjustability, the TRA just rolls better. The result is better performance and comfort built around you.
- Rigid Dual-Tube frame chairs are the lightest and highest performing chairs because they are constructed from the fewest possible components and have the fewest moving parts.
- Ease of Transport and Energy Saving: no wasted energy with a swept-in dual-tube frame and fewer strokes throughout the day.
- The centre of gravity can be moved forward, backward, up and down, and all backrest options are adjustable meet your specific needs. Precision Lock components make these adjustments easier and faster than ever.
- Precision Lock Backrest combines a minimal design with matched adjustability. Your backrest can now be adjusted in a matter of minutes. The Precision Lock Backrest offers infinite adjustments to meet your needs and can be made while the user sits in the chair.
- The Precision Lock Caster is a simplified and more accurate way to square your wheelchair in under a few minutes. It is the only caster system that can be adjusted by a single bolt with infinite adjustment positions.
- The Ergonomic Advantage provides an additional unique bend in the frame creating an ergonomic seat slope sitting you lower in the chair providing greater pelvic stability and improved posture through optimal contouring.
- Zero Play Camber Plugs give a much tighter feel to the chair like sport suspension in a car. CNC machined from billet aluminium to the highest tolerances, they remove any side to side movement from the rear wheels.
