

TiLite 2GX

permobil

TiLite

- **Titanium performance:** The 2GX combines the advantages of a modular folding frame with the high strength and vibration dampening characteristics of titanium. Add full adjustability and the 2GX is designed to empower – no matter where you choose to roll.
- The modular frame design of the 2GX facilitates configurability in the field. This includes adding aftermarket seating systems, switching fixed and swing away front ends, and growing chair width and/or depth to meet changing customer needs.
- The Tru-Fit system opens up the world of adjustability by incorporating an infinite adjustment mechanism. The Tru-Fit system allows you to fine tune the fit of your wheelchair because you are not limited to a series of pre-set holes.
- The 2GX titanium folding frame is compact, with a fluid, easy-to-use folding mechanism. Side-to-side folding minimises the folding width and maximises ease of transportation.
- Titanium provides a smoother ride, won't break, and has the highest strength-to-weight ratio of any metal on Earth. That is why TiLite builds our highest performing wheelchairs from seamless, aerospace-grade titanium.
- Snap-In Seat Saddles lock the cross tubes in place on TiLite's rigid folding mechanism. This feature helps the 2GX achieve rigid chair performance.
