GREINER
MULTILINE NEXT IT.

This compact couch meets the specific needs of oncology day hospitals, infusion medicine and transfusion medicine. It combines space-saving design with the comfort and security of fully equipped models. Patients and those caring for them enjoy the full range of amenities and features, with the couch quickly conveying patients into the most suitable position for therapy. With a seat width of 60 cm and the perpendicular angle of the leg section, it can be used as a chair. The comfortable, extra soft upholstery, patient-friendly armrests that support therapy and wide range of fittings make the MULTILINE NEXT IT a next-generation couch.
COMPACT THERAPY COUCH FOR INFUSION AND TRANSFUSION.

Chemotherapy in outpatient oncology departments is a major issue of our times. With much of the treatment being administered while patients are seated, there is a demand for couches that offer maximum comfort in this position too. With the available space often confined, couches are needed that can demonstrate quality even in very enclosed areas. Upholstery and armrests are critical to patient comfort. Depending on age and health status, patient access in the seated position also plays a key role in acceptance by patients and those caring for them. Generally speaking, the demands are high – and the new MULTILINE NEXT IT meets them in full thanks to the chair-like access it offers.

GREINER for oncology:

- Totally new concept in terms of design, technology and features; smooth-running mobility with central locking if required
- Version with three motors for the stepless adjustment of backrest, seat and leg section into required positions, including the emergency Trendelenburg position
- Comfortable cushioning in a wide range of colours, high levels of seated and reclining comfort, maximum hygiene with a minimum of seams
- Unique design with 90° angle of leg section – perfect for chair-like access and exit, minimal space requirement
- Flexible design variants and configurations adapt to every practical purpose
- Independently certified product safety and superb reliability
MULTILINE NEXT IT. ONCOLOGY THERAPY COUCH.

The new therapy couch developed by GREINER packs the performance of technically sophisticated couches into a compact form for restricted spaces. Designed for patients who may be very weak or afflicted by extreme symptoms, the couch helps them through the difficult times. It features ease of access, smooth rollers, clear functions, stepless motorised movement to the required position, comfortable armrests and cozy upholstery in soothing colours. The emphasis is on patient comfort, ergonomics and efficiency to ensure the best treatment conditions for patients over hours of chemotherapy.
Comfort, functionality and ergonomics.
With stepless motorised adjustment and intelligent and intuitive operation via the selection and control keys of the GREINER control element, the MULTILINE NEXT IT for infusion and transfusion therapy promises high levels of seated and reclining comfort in all situations. The three-motor couch quickly and gently moves to any required or preferred position – from seated, relax and bed positions to the emergency Trendelenburg position – at the touch of a button. Access and exit is considerably eased by the vertical leg section and access height of 54 cm.

The GREINER design concept makes it easy for carers and patients alike to use the powerful motors for the backrest, seat and leg sections efficiently. The couch is mobile, stable and secure.
MULTILINE NEXT IT. NEW LEVEL OF COMFORT FOR INFUSION AND TRANSFUSION.

GREINER treatment couches are supplied with many inclusions as standard, however can be tailored to your precise needs. Premium covering materials and upholstery offer extra-soft, wear resistant surfaces; a dynamically flexible suspension system within the seating surface supports freedom of movement for the spine, pelvis and hips, thus relieving pressure to the benefit of patients. Innovative MULTILINE five-position armrests, the first to move in five directions, are setting new standards.

Available in Navy Vinyl. A range of custom colours are available upon request. (Lead times may vary)

Low-level access from the front and side

Unique armrest technology with patient-friendly positioning
