GREINER
MULTILINE XXL

This heavy duty couch meets the bariatric needs of oncology day hospitals, infusion medicine and transfusion medicine. It combines the comfort and security of oncology couches with the ability to facilitate bariatric treatment. Patients and those caring for them enjoy the full range of amenities and features, with the couch quickly conveying patients into the most suitable position for therapy. With a wide seat width of 70cm and ability to transfer patients from a sitting to standing position, the XXL is a true bariatric solution. The comfortable, extra soft upholstery, patient friendly armrests that support therapy and wide range of fittings make the MULTILINE XXL a next-generation couch.
A TRUE BARIATRIC SOLUTION.

The development of the XXL chair ensures that bariatric treatment in all areas of care and application is simplified. As a result, the XXL chair can be universally used for transport, examinations and treatments, as a nursing chair and for rest or recovery. The armrests can be easily removed for patient transfer, side entry, treatment and relocation.

**GREINER for oncology:**

- Totally new concept in terms of design, technology and features; smooth-running mobility with central locking if required
- Version with three motors for the stepless adjustment of backrest, seat and leg section into required positions, including the emergency Trendelenburg position
- Comfortable cushioning in a wide range of colours, high levels of seated and reclining comfort, maximum hygiene with a minimum of seams
- Unique design with 90° angle of leg section – perfect for chair-like access and exit, minimal space requirement
- Flexible design variants and configurations adapt to every practical purpose
- Independently certified product safety and superb reliability
MULTILINE XXL. BARIATRIC TREATMENT SOLUTION.

The new therapy couch developed by Greiner packs the performance of technically sophisticated couches into a bariatric solution. Designed for patients who may be very weak or afflicted by extreme symptoms, the couch helps them through the difficult times. It features ease of access, smooth rollers, clear functions, stepless motorised movement to the required position, comfortable armrests and cosy upholstery in soothing colours. The emphasis is on patient comfort, ergonomics and efficiency to ensure the best treatment conditions for patients over hours of chemotherapy.
GREINER hand control unit with intelligent operation: simple, internationally understandable symbols; keys for basic settings for seated, relax, flat bed and Trendelenburg positions are easily accessed in an emergency. Safety is assured thanks to a magnetic key lock.

Comfort, functionality and ergonomics.
With stepless motorised adjustment and intelligent and intuitive operation via the selection and control keys of the GREINER control element, the MULTILINE XXL for infusion and transfusion therapy promises high levels of seated and reclining comfort in all situations. The three-motor couch quickly and gently moves to any required or preferred position – from seated, relax and bed positions to the emergency Trendelenburg position – at the touch of a button. Access and exit is considerably eased by the vertical leg section and adjustable access height of 55-80cm.

The GREINER design concept makes it easy for carers and patients alike to use the powerful motors for the backrest, seat and leg sections efficiently. The couch is mobile, stable and secure.
MULTILINE NEXT XXL. NEW LEVEL OF COMFORT FOR INFUSION AND TRANSFUSION.

GREINER treatment couches are supplied with many inclusions as standard, however can be tailored to your precise needs. Premium covering materials and upholstery offer extra soft, wear resistant surfaces; a dynamically flexible suspension system within the seating surface supports freedom of movement for the spine, pelvis and hips, thus relieving pressure to the benefit of patients.
