4HC CAELI COMBINATION MATTRESS SYSTEM - AVAILABLE SOON

We are pleased to announce the arrival of the Caeli from 4Healthcare.

The Caeli is a combination mattress replacement system which combines 125mm low air loss alternating cells with a 50mm protective foam underlay to provide an economical mattress combination that can assist with pressure injury prevention in low to medium risk situations.

NOTE - for higher risk situations the most clinically appropriate solution should be sought/recommended from our Aspire Active Air range.

PRODUCT FEATURES

- **Combination mattress** replacement with 125mm alternating air cells and 50mm foam underlay.
- **Low air loss cells** assist with cooling, reducing moisture build up.
- **Dual CPR** release valves for maximum efficiency in emergency situations.
- **Transport cap** keeps mattress inflated for up to 24 hours.
- **Carry handles** on both sides.
- **Fluid resistant cover** with two-way stretch material.
- **Digital pump** with easy-to-use interface.
- **Codes:** PTM640100 (Single) & PTM640110 (King Single)
