ARIA ICU Bed

MALVESTIO
Made in Italy

The ARIA ICU bed is designed with patient and care staff welfare in mind. It offers integrated features to ease care staff burden whilst creating a comfortable and effective patient support surface.

IEC 60601 - 2 - 52 APPROVED

Incentro System
Combined back and pelvic adjustment nullifies horizontal sheer forces; prevents slipping; and keeps the body at a 30° angle, optimal for ventilation.

Alarms
Orange Light indicates an unsafe platform height (and green means it is safe) for transport.

Once connected to power, an alarm sound alerts the nursing staff if the bed remains 'Un-Braked'.
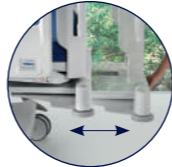

OPTIONAL ACCESSORIES

Self Help Pole (BEA825090)

Telescopic IV Pole (BEA825090)

Folding Monitor Tray (BEA825094)

Oxygen Bottle Holder (BEA825092)

Hospital Beds

Aidacare's hospital beds cater to the specific needs of a busy ward environment. With patient health and comfort in mind, our hospital beds offer an economical and versatile solution for all types of hospitals and medical facilities. High-quality, durable components and robust construction mean these hospital beds are designed to last.

Features include electronic controls, a backup battery, and a myriad of positioning options to reduce manual handling and enhance patient comfort. With the addition of a hospital-grade mattress, these hospital beds are suited for general patient care, rehabilitation, or patients with high-risk care needs.

Choose from a range of hospital beds for sale, including medical beds, hi-lo positioning beds, ward beds and ICU beds.

Bed Lengthener
200mm of extension to cater for taller patients

Optional X-Ray Tray
For x-ray procedures

FL250 Floorline Acute Bed

aidacare FL250

Our most popular Floorline bed has the ability to be converted for hospital/acute use with key elements such as removable bed ends, moulded plastic components for improved infection control, and full CPR functionality.

IEC ★★★ 60601 - 2 - 52 APPROVED

Falls Solution

- Sleeping low is an effective way to reduce the risk of falls related injuries
- Seated bed positioning assists with ingress and egress, again reducing falls

Conversion Kit

Conversion Kit improves the functionality of the bed.

The kit contains:

- Handset with CPR
- Nurse Control Panel with CPR
- Bed End
- Brackets
- Moulded Plastic Bed Ends

CPR FUNCTION

BATTERY BACK-UP

- Aidacare FL250 Beds are designed and manufactured in compliance with International Medical Device Safety standard IEC60601-1, IEC60601-2-52. All electronics are designed for use in Acute Care environments and comply with relevant Electrical Safety Standards
- **SmartDescent** automatically slows descent speed allowing possible impingements to be identified and moved
- **Auto-regression** in backrest and knee break for shear-force reduction
- **Chair Positioning** improves pressure management and respiration and more comfortable dining and sitting
- **Moulded Plastic Bed Ends** are easily removed for improved response times
- **Underbed lighting** provides enhanced night navigation for falls prevention
- **Mattress retainers** located at sides and foot end (extendable)
- Foot activated In-line brakes are colour coded for enhanced usability
- **Control panel** - convenient mobile nurse control panel with CPR functionality for efficient care delivery
- **CPR Position** within 10 seconds using the electronic CPR function on handset or nurse control panel

Support Surfaces

The Aspire **LIFECOMFORT®**, **HYBRID,** and **ACTIVE AIR®** mattresses have set the benchmark in sleep surface quality and performance in Australia.

They are fitted with superior hospital grade polyurethane coated covers designed to withstand the rigors of usage and cleaning requirements in all environments up to the most stringent hospital infection control.

Multiple available combinations of foam or alternating air layers provide maximum comfort, support, and pressure redistribution across a very wide spectrum of user sizes, shapes, and pressure care needs.

LIFECOMFORT® FOAM & HYBRID MATTRESSES

SUB-ACUTE AND HOSPITAL FOCUSED PRESSURE REDISTRIBUTION

LOW NEEDS

MEDIUM NEEDS
Age Care

HIGH NEEDS
Sub-Acute & Hospital

LIFECOMFORT® MATTRESSES cater to a broad spectrum of Pressure Care risk ratings from low to high.

Engineered to suit the broad patient weight requirements and pressure care needs of acute care environments. Reinforced hinged sidewalls assist transfer efficiency and accentuate the sleep surface edge. Layered sleep surface maximises pressure redistribution and immersion for patient comfort and improved sleep quality.

STANDARD INCLUSION

- **Durable hospital grade foam** that is treated for antimicrobial and antibacterial properties.
- **Breathable, 4-way stretch waterproof cover** to reduce shear, friction and maintain skin microclimate
- **Medical grade waterfall covers** are fully-welded over the zipper to maximise infection control
- **Asset management ready** with unique batch and serial numbers printed on all covers

CLINICAL BENEFITS

SHEAR MITIGATION

ENTRY AND EXIT SAFETY

IMMERSION

FRICTION REDUCTION

SKIN MICROCLIMATE

HIGHER SWL

STANDARD FEATURES

INFECTION CONTROL
Welded seams and waterfall over zippers on mattress covers

HOSPITAL GRADE
Suitable for bleach concentrations up to 10,000ppm

4-WAY STRETCH WATERPROOF FABRIC
For enhanced shear mitigation and friction reduction

CARRY HANDLE
Integrated handles for safe manual handling

4-SIDED ZIPPER
Easily removable cover for effective cleaning

IMMERSION
Surface cradles and contours around the user for personalised pressure relief and comfort
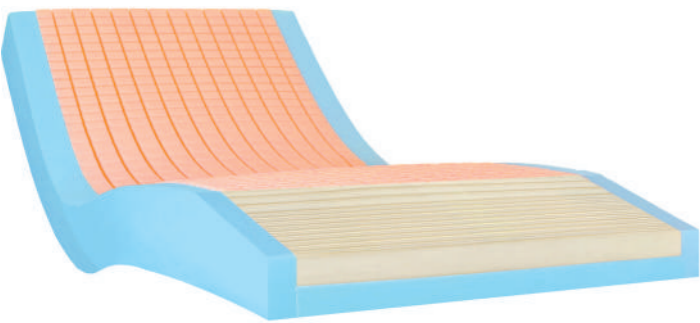

LIFE CYCLE & COMPLIANCE

- **Warranty:** 5 years Foam | 5 years Cover
- **Machine Washable Covers:** Up to 95°
- **Safe Working Load Verified:** AS/NZ 2282
- **Durability + Performance:** ISO 3385
- **Flame Retardant Foam + Covers:** AS/NZ 4088.1 Cribs 5.
- **TGA:** Lifecomfort® Mattresses are registered in the ARTG, AUST R ARTG 288486

CUSTOMISATION

Unique User Needs:
Palliative, unusual body shapes, zoning needs, ROHO® inserts or specific mattress sizes

Facility Asset Management:
Customised labelling for institutional orders

Acute Care Mattress

aspire **LIFECOMFORT**

- Ultra-soft Heel Protection Zone improves pressure relief for vulnerable points
- By gently tapering the heel area, pressure is redistributed effectively onto the less vulnerable calf area
- The sidewall assists with patient transfers as well as creates roll resistance at the sleep surface edge

FOAM LAYERS

Immersive Castellated Surface 50mm
Castellated cells offer greater airflow and transitional support

Comfort Layer 50mm
Visco-elastic comfort and envelopment

Safety & Support Base 50mm
Strong U-shaped base for maximum durability and support

Integrated Side Walls
Strong rigid side layers for transfer efficiency and safety

APPLICATIONS
- Hospital
- Age Care
- Home Care
- Palliative Care

EFFECTIVE WEIGHT RANGE: 30-250KG

INFECTION CONTROL | BREATHABLE

Hybrid Comfort

aspire **LIFECOMFORT**

- Hybrid mattress system with foam and air cell combination
- Flexible operation as an immersive foam static support surface or a powered-up alternating pressure support surface
- Visco-elastic (memory foam) top layer for warmth and comfort
- Heal taper with castellated memory foam for pressure injury protection
- Engineered for patient comfort, foam layering effectively supports patient weight from:
  - 30 - 230kg (Single & King Single)
  - 30 - 380kg (Bariatric)

OPTIONAL ACCESSORIES

ACTIVE AIR® MATTRESSES

Pressure Injury prevention and management play a significant part in the overall care of residents and patients in aged and acute care settings. The Active Air® range of alternating mattresses has been designed in accordance with the principles of international guidelines around pressure care. These guidelines clarify the key risk factors in Pressure Injury development. The Active Air® range is a suitable solution for At-Risk to High-Risk users in all clinical environments.

Pressure Injury Prevention

PRESSURE & REPERFUSION

The Active Air® range alternates in a 1-in-2 pattern so that 50% of body weight is relieved of pressure. This 'pressure on / pressure off' cycle encourages reperfusion and facilitates pressure reduction.

1:2 Cycle

mmHg (Pressure)

Time

Elasticised air cells "rebound" quickly to maximise the pressure-off time.

MOISTURE / MICROCLIMATE

The Active Air® BARI 10 (PTM639510) has air cells which directly release air to promote a cool and dry microclimate.

Other Active Air® mattresses encourage air flow through the alternating cycle by drawing and pushing air directly into the mattress as the cells inflate and deflate, helping to ventilate and reduce skin heat and moisture.

The **multi-stretch vapour permeable covers** assist in microclimate management.

The high Moisture Vapour Transfer Rate (MVTR) promotes air flow and breathability for optimal skin conditions.

SHEAR FORCE REDUCTION

The Active Air® multi-stretch permeable covers move with the user, reducing friction and shear, whilst the vapour permeability promotes skin integrity and optimises skin microclimate.

Valve

Airflow
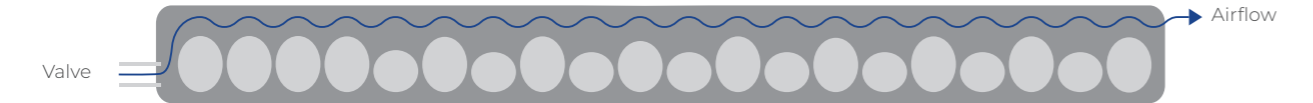

1. European Pressure Ulcer Advisory Panel, National Pressure Injury Advisory Panel and Pan Pacific Pressure Injury Alliance. Prevention and Treatment of Pressure Ulcers/Injuries: Clinical Practice Guideline. The International Guideline. Emily Haesler (Ed.). EPUAP/NPIAP/PPPIA; 2019.

OTHER FEATURES

Cell-In-Cell Technology

The alternating air cells contain an internal 'safety cell', which remains fully inflated to protect against 'bottoming out', increasing patient safety and greater surface stability.

AutoStay Band

Active Air® overlays and mattresses feature the AutoStay retention band, which holds cells in place for maximum therapeutic effect.

## Active Air® 4 Mattress Overlay

aspire LIFECOMFORT®

- The Active Air® 4 features COMFORT CONTROL adjustable pressure, allowing caregivers to adjust the pressure to suit the users needs
- An ideal solution for Home Care or Facility environments for users considered to be at risk of pressure injury
- Breathable multi-stretch cover with welded seams and zip protection
- Variable cycle times: 10, 15 or 20 minutes
- Integrated cable management so cables are not damaged
- Simple, easy to use semi-digital pump
- Patented cable lock protection to prevent cable disconnection

  Overlays are used in conjunction with a foam mattress

Code	PTM639100 - Single
Overall Width	850mm

Active Air® 5 Mattress Overlay

aspire LIFECOMFORT®

- The Active Air® 5 provides an effective solution for higher weight users considered to be at risk of pressure injury
- The Active Air 5 is suitable for use in a wide range of care settings from home care to long term care
- **Auto Detect:** Based on the user's detected weight, the pump adjusts output for optimal care
- **Intelligent Static Mode:** The system automatically reverts to an alternating cycle (after 30 minutes) in the event that static transfer mode is left on
- Breathable multi-stretch cover with welded seams and waterfall zip protection
- Variable cycle times: 10, 15 or 20 mins
- Integrated cable management so cables are not damaged
- Patented cable lock protection to prevent cable disconnection

  Overlays are used in conjunction with a foam mattress

Ultimate 8 Mattress Replacement

aspire LIFECOMFORT®

- A cost effective mattress replacement solution
- Rapid release CPR allows quick deflation of the mattress, including head cells, in emergencies
- Easy-to-read LCD screen
- Improves workplace safety via integrated power cord management in the mattress cover
- Provides a whisper-quiet sleep environment using an innovative pump to reduce noise and vibration
- 11 minute cycle time
- Improves sleep comfort by passing room temperature air beneath the sleep surface to regulate body temperature
- Prevents fluid and bacterial ingress with welded seams and zip protection
- Multi-stretch cover reduces shear and offers a high moisture vapour transfer rate (MVTR) to control skin microclimate
- Mattress cover can be laundered at up to 85°

Active Air® 8 Mattress Replacement

aspire LIFECOMFORT®

- The Active Air® 8 is a dynamic mattress replacement suitable for users at very high risk of pressure injury
- **AutoDetect:** Pressure output automatically set based on the user's weight and size
- **AutoProtect:** Air pressure automatically increases to prevent bottoming out when bed head raised to 45°+
- **Continuous Low Pressure (CLP):** Increases user immersion and envelopment
- Choice of 10, 15, 20, 25 or 30 minute cycle times
- **Cell-in-cell technology** is a static safety cell layer which maintains full inflation throughout all cycles to prevent bottoming out risk
- Breathable multi-stretch cover with welded seems and zip protection
- Integrated cable management

Active Air® Acute 8 with turnassist

aspire LIFECOMFORT®

- A dynamic mattress replacement suitable for users at very high risk of pressure injury. Featuring easy to operate lateral air cells to assist with patient turning, the Active Air® 8 Acute provides the highest levels of care into acute and long term care environments
- **TurnAssist** valves located on the side of the mattress engage integrated lateral air cells to tilt the mattress surface by an angle of up to 30°. This improves bed washing, changing of linen and clothing, positioning of manual handling slings/sheets and targeted relief of asymmetric/laterally located pressure areas. Drastically improves WHS outcomes for care workers by minimising manual handling
- **Auto Detect:** Based on the user's detected weight, the pump adjusts output for optimal care
- **Cell-in-cell technology** is a static safety cell layer which maintains full inflation throughout all cycles to prevent bottoming out risk

Patient Trolleys

Aidacare's range of patient trolleys are designed to make transporting patients quick and easy.

Our medical patient trolleys are ideal for hospitals. They can be used to transfer patients between rooms and wards, in and out of surgical suites, and more. All of our patient transport trolleys feature a durable construction that allows them to withstand the daily rigours of hospital use. Our selection features high-quality options from reputable brands.

They are also designed for optimal comfort, safety and hygiene. As well as making transfers gentler on patients, our trolleys can reduce the risk of strain and injury to staff caused by manual handling.

SWL	260kg

ARTG - 295859

- 4-section fully electric patient trolley with reduced footprint for easier access
- Fifth central wheel improves steering and reduces manual handling burden
- The 260kg SWL and inbuilt leg extension facilitate changing patient and clinical needs
- Hand control flexible arm for patient independence and comfort, hand control option available on request
- Battery backup for use during power outages
- Audible alarm system sounds when mains power is lost and when brakes are unlocked
- Quick Release CPR for backrest and knee break ensures the trolley is always emergency-ready
- Frame is finished with Biocote®, an antibacterial coating for improved infection control

Vela Stretcher

MALVESTIO
Made in Italy

The Vela hydraulic stretcher range is designed to make patient care easier and more efficient for hospital staff. It offers flexible positioning, X-ray compatibility, and smooth steering for easier transfers and procedures. Built-in features like oxygen bottle holders and drainage hooks save time, while its design ensures safety and comfort for patients.

Patient Hygiene

Maintaining good patient hygiene is not only essential for recovery and to avoid infection, it also helps to maintain patient dignity and comfort.

Many bathroom tasks, such as using the toilet and showering, can be challenging for unwell, injured, or mobility-impaired patients. It can also be strenuous and potentially dangerous for the staff who need to assist them.

At Aidacare, we provide a range of patient hygiene aids that are ideal for hospitals and clinical facilities. Designed to provide support and assistance to both patients and carers, our aids can help ensure safety and comfort for both parties.

The Aidacare selection of patient hygiene aids includes shower chair and stools, shower commodes, shower trolleys, toileting aids, over toilet aids, and toilet surrounds.

Patient Transport and Mobility

In demanding hospital and medical environments, robust and durable wheelchairs are essential. Designed to help transfer those who are unable to walk, a wheelchair is useful for patients entering and exiting the hospital, as well as those who need to be moved between rooms, wards, and areas.

Aidacare offers a range of high-quality wheelchairs that can be used to transfer patients safely and comfortably. Our selection of wheelchairs includes a variety of manual options as well as sturdy bariatric choices. We also offer foldable styles, which are ideal for easy storage when not in use. Suitable for hospitals and medical facilities, our wheelchairs are easy to push and manoeuvre. They are available in various sizes and designs to cater to different requirements.

Scan to browse our Pressure Relief Chairs online or visit **aidacare.com.au** to see our full range of products and services

Pressure Relief Chairs

Patients who spend extended periods of time sitting or lying require specific mobility aids to ensure they remain comfortable and to prevent the development of pressure sores. Uniquely designed to allow immersion and envelopment, pressure relief chairs help to redistribute pressure across the surface of the skin.

Made using specialised fabrics, the Aidacare collection of pressure relief seats and chairs are designed to be comfortable, durable, and easy to clean. Our selection of air comfort chairs also offers users exceptional comfort and relief with the aid of air cushioned seating. Along with our selection of pressure relieving chairs, you will also find a comprehensive range of accessories including legrests, armrest covers, tray tables, seat covers, seat belts, head cushions, and footplates.

Mobile Air Chair

aspire

- Promotes skin immersion and envelopment, redistributing skin pressure, reducing the risk of pressure injury
- Lie-flat position converts chair into a bed for prolonged periods of use
- Swing away wings and armrests for improved patient transfer access
- Adjustable foam matrix in backrest
- Gas assisted tilt, recline, and leg raise
- Removable and washable covers for infection control
- Lockable castors with directional control

OPTIONAL

Padded Footrest (CHP198860)

Meal Tray (CHP198861)

Fold-away Tray Table (CHP198862)

Milano Chair Manual/Electric

Seating Matters

Provides support, comfort, and pressure management to patients with low to medium support needs and those who still maintain a degree of mobility.

Manual model has gas assisted tilt-in-space, an elevating leg rest, and back angle recline.

Electric model has a three feature controller handset that includes motorised tilt-in-space, elevating leg rest, and back angle recline. It includes a Linak Lithium Battery Control Box allowing the chair to be used without connection to mains power.

- Tilt, recline, and leg rest
- Tilt in space to allow for re-positioning
- Medium to high pressure management cushion, using memory foam
- Adjustable seat width, depth, and foot plate height
- A lightweight frame with directional castors

Scan to browse our range of Sanitisers & Macerators online or visit **aidacare.com.au** to see our full range of products and services

Sanitisers and Macerators

Central Sterile Services Departments (CSSDs) and pan rooms play vital roles in hospitals and other healthcare facilities. While the pan room accommodates the equipment and utensils required to handle human waste from incapacitated acute care patients, the CCSD manages the cleaning and sterilising of all reusable products and instruments. As such, both are essential elements of hospital hygiene management.

To ensure hospitals are equipped with what they need, Aidacare supplies a range of CSSD and pan room items and equipment. Our selection includes a variety of plasticware and consumables, such as bowls and pans, pulp shapes, detergent, and deodoriser. We also provide high-quality washer sanitisers and macerators, which are ideal for cleaning and steam disinfecting bedpans, urine bottles, slipper pans, bowls, and other utensils.

Panamatic Optima 3+ Sanitiser

The Panamatic Optima 3+ Washer Sanitiser operates with hot and cold water. The large wash chamber accommodates up to 6 utensils and urine bottles per cycle.

- Improved wash performance (Hot and cold water)
- Hands-free open, close and start
- Large capacity chamber
- Easier loading
  + Data logger and dual probes

Meiko Sanitisers

Meiko is a recognised global leader in cleaning and disinfection solutions. Meiko combines German engineering and design to deliver a compact, flexible, and highly-functional range of front-loading sanitiser solutions. In addition to equipment supply, Meiko offer full sluice / clean-room design options and a large range of complimentary accessories. Meiko equipment is water and energy efficient and is cost-effective to maintain with only a single annual service recommended (or every 5000 cycles).

Topic Range

The Topic range of sanitisers are available in a Wall Mounted (Topic 10); Floor Mounted (Topic 20); Under Bench (Topic 30); and Cabinet (Topic 40) versions. Offered as a more economical choice with fewer features than the premium TopLine range, this range offers full standards-compliant disinfection and great features (such as hands-free open/close in the AT model) to reduce cross-contamination.

Topic 10 & Topic 20

- Simple and logical electronic interface with clear detergent and temperature indicators help reduce wash errors
- Temperature data logging, hands-free open / close (AT model), warm and cold water supply
- Total system disinfection after each completed wash cycle
- Capacity: 2 bed pans and 2 urine bottles or 3 urine bottles
- 3 Program options (Short / Normal / Intensive), variable cycle times:
  - Short: 24 bed pans and 24 urine bottles or 36 urine bottles per hour
  - Normal: 11 bed pans and 11 urine bottles per hour
  - Intensive: 9 bed pans and 9 urine bottles per hour
- Efficient water use: Short (23L); Normal (31L); Intensive (39L)
- Energy efficient at 235 watts: 240V, 50Hz, 16A, 3kw. 3-phase connection
- Complies with AS4187:2014 > ISO 15883, 1 and 3

Code	UPM200500	UPM200510	UPM200520	UPM200530

ARTG - 164116

Topic 20 XL

For high-volume workflow solutions, MEIKO offer the TOPIC 20 in a side-by-side configuration called the 'XL'.

- Dual usage provides high-flow during peak-use periods
- Single usage during quieter periods increases efficiency by decreasing water and electricity use and cycle times
- System redundancy in the event of an outage helps ensure operational continuity
- Utilises existing water and electrical connections to ensure installation cost-effectiveness

TopLine Range

The TopLine range provides a premium option with enhanced features compared to the more economical Topic range. It comes in four versions: Wall Mounted (TopLine 10), Floor Mounted (TopLine 20), Under-bench (TopLine 30), and Cabinet (TopLine 40).

Key features include a Telescoping Rotary Jet that reaches inside bedpans and under their edges for thorough cleaning, and a cooling and drying cycle that ensures devices are dry when removed, eliminating the need for drip trays and drying racks.

Topline 10 & Topline 20

Topline 10 AT
(Wall Mounted)

Topline 20 AT
(Floor Mounted)

- Simple and logical electronic interface for staff with clear program selection and alert indicators
- Hands-free open / close (with AT model)
- Warm and cold water supply
- Total system disinfection: Disinfects all water channels after each completed wash cycle to avoid the risk of recontamination
- 3 Program options (Short / Normal / Intensive) for disinfection from A060 (Short) to A03000 (Intensive) for higher disinfection value
- Variable cycle times depending on which program option selected: Short (5min), Normal (5.5min), Intensive (6min)
- Capacity: 2 bed pans and 2 urine bottles or 3 urine bottles per cycle
  - Short: 24 bed pans and 24 urine bottles or 36 urine bottles per hour
  - Normal: 11 bed pans and 11 urine bottles per hour
  - Intensive: 9 bed pans and 9 urine bottles per hour
- Efficient water use depending on program option: short (23 L); Normal (31 L); Intensive (39 L)
- Energy efficient at 235 watts: 240V, 50Hz, 16A, 3kw. 3-phase connection
- Complies with AS4187:2014 > ISO 15883, 1 and 3

Maternity

Aidacare offers specialised equipment to cater to the needs of many different hospital wards and departments, including maternity wards. Our selection of products for maternity wards includes delivery and maternity beds, baby cots, and support person chairs. All items included in our range are designed and manufactured for superior safety, comfort, durability, hygiene, and function. Our delivery beds are robust and sturdy while our cots offer the comfort and safety required for the care of newborn babies.

The Aidacare maternity range features products from a curated selection of reputable brands and labels. These brands are highly trusted and known within the industry for providing exceptional hospital equipment.

HEALTHCARE EQUIPMENT

4H175E Electric Paediatric Cot

aspire

- Easy-to-operate side rails are designed for simplicity and can be managed with one hand, enhancing patient safety and allowing caregivers to make quick adjustments, even when multitasking
- The open base design provides all-around access from all sides, facilitating comprehensive care and reducing the risk of care-related injuries
- Emergency-ready positioning features an integrated Trendelenburg function, allowing tilting up to +12° for emergencies, with a manual release lever to quickly return to a flat position for stability
- Integrated battery backup system for added safety
- Electric hi/low functionality allows for seamless height adjustments, catering to various care needs and enhancing patient comfort

Patient Handling: Mobile

Patient handling is a necessary part of any hospital environment, but it can also be strenuous and potentially dangerous for both patient and nurses or carers.

The right equipment can make moving and transferring hospital patients simpler and safer. At Aidacare, we provide a variety of patient handling equipment that can eliminate or reduce the need for manually lifting and moving patients. Our products can suit a range of needs, providing support and assistance when needed.

The Aidacare range of patient handling equipment includes patient lifters and slings, ceiling hoists, movers, slide sheets, and evacuation sheets. We also offer an assortment of items that are ideal for bariatric patients. All items in our range are expertly manufactured for safe and easy use.

Patient Handling: Ceiling Systems

Ceiling hoists are ideal for transferring patients within a hospital setting. Designed for use by those with limited mobility, these items of equipment can aid nurses and staff in their care and handling of patients. Unlike standing styles, ceiling lifts are secured to the roof. Utilising gantries and tracks, they are able to hoist and move patients around hospital rooms.

The Aidacare selection of ceiling hoists includes high-quality options that provide the utmost support and safety. Our products are able to gently and easily move patients while eliminating potential strains and injuries for staff. Our wide range of motor and track options allows us to cater to many needs.

As well as distributing ceiling hoist systems, we also provide expert advice and installation through our network of Aidacare and partner locations.

Ceiling Hoist Considerations

Aidacare is an experienced supplier and installer of ceiling hoist systems. We understand the risks involved in the installation and use of ceiling hoists and can help during the early-stage specification and design process to reduce risk and improve user-acceptance.

Our systems are world-class and are accompanied by accredited installation guidelines which allow us to work with a range of installers.

Aidacare is an ISO 9001 accredited company and consistently provides high-quality outcomes for Australia's largest Aged Care and Hospital providers.

We can supply and install a combination of motor, track and accessory options to suit client specification.

Some common examples of the options are provided in the diagram below.

A Structural Attachment Point

B Threaded Rod/Steel Pendant

C Ceiling Bracket

D Ceiling Track

E Traverse (Track)

F Charging Station (Various charging options)

G X-Y/Traverse Rail Carrier

H Ceiling Lift Motor

I Spreader/Sling Bar

J Lift Strap

K Sling

L Gait Assembly

M Linear/Straight Track

N Modified Door Header
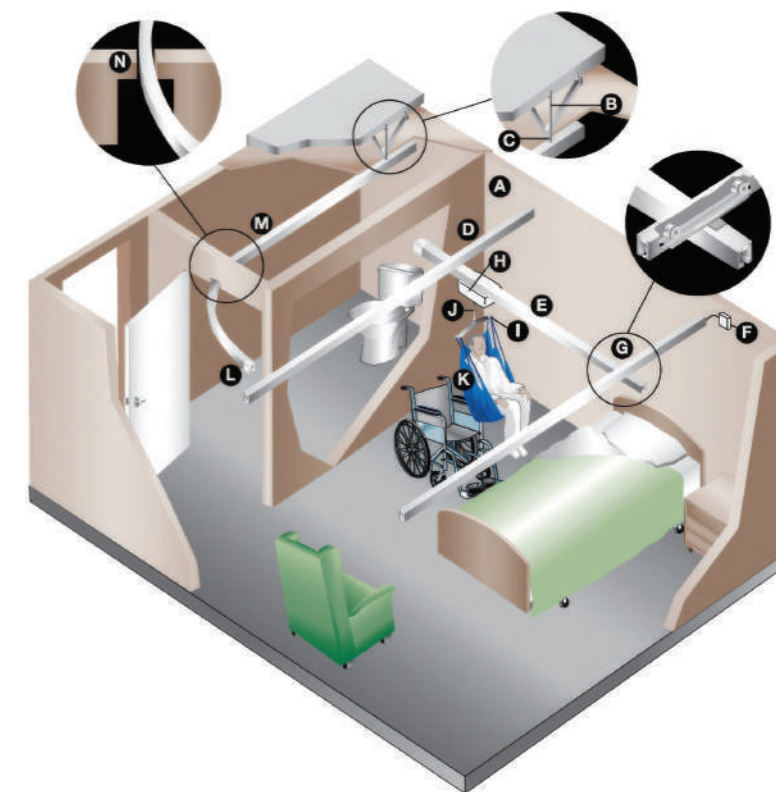

Consulting Solutions

Aidacare has extensive experience with installation and user-acceptance of ceiling systems. Simple things can be identified during planning to reduce risk in the installation and improve user and patient outcomes. We can assist in developing the best solution.

Multirall 200 Patient Lift Portable

Liko

- The Multirall 200 hoist is a portable ceiling hoist that can also be used for room-to-room patient transfers
- Can be used to transfer a patient between rooms in a sitting position, easily moving from one rail system to another with the use of a transfer strap
- It's portability makes it an excellent and economical solution for nursing home and hospital care situations where lifting needs are temporary
- Can be easily attached or removed with no tools and minimum effort from ceiling rails to facilitate convenient transport between rooms
- Quick sling bar change possible thanks to Q-link and the Quick-release hook
- Can be mounted two ways for ease of use

RehaMove2

HASOMED⁺

- Portable electrical stimulation device that generates impulses on up to 8 channels simultaneously to activate impaired/paralyzed muscles via surface electrodes
- Relieves muscle spasms, prevent or avoid atrophy due to immobilization, increase the local blood flow or increase respectively maintain the range of motion
- Designed for use in a specific rehabilitation system using an ergometer for FES Cycling
- Big graphical display, pressure-sensitive buttons, and a rotary switch
- Numerous parameters for power and temporal sequence of the impulses can be adjusted individually
- RehaMove2 is designed as portable (contains a battery) as well as stationary device for training and rehabilitation applications
- Tapping [Stop] on the screen or pressing the Quick-Stop button stops the movement and stimulation immediately. Electrode error detection function stops the device in case of faulty electrodes or other errors
- Certified according to the international standards EN 60601-1 and EN 60601-2-10 for medical technical devices and systems

Can be attached to Motomed products for: Motion Training with Functional Electrical Stimulation (FES)

Falls Prevention

These devices enable you to live more safely at home or to facilitate safety and care for hospital patients and aged care facility residents.

There are a number of items which can be easily integrated into any environment including, emergency call systems, alerting devices, and fall safety mats. Making your environment safer reduces the likelihood of injury and falls.

Dual Beam Bed Monitor

INVISA-BEAM®

OPTIONAL ACCESSORIES

Entry Pass (BEA007211)

The Entry Pass is like a master key. It allows the nurse free access to the patient without worrying about switches.

When the nurse attends to the patient in response to an alarm:
- The Entry Pass cancels the alarm
- The bed monitor alarms automatically resets when the nurse leaves the bed

Invisalert - Pager (BEA007214)

INVISALERT allows the nurse free access to the patient without worrying about switches.
- Displays the location of the alarm source – bed and room
- Vibrating alarm
- Audible alarm

When the nurse attends to the patient in response to an alarm:
- INVISALERT cancels the alarm
- The bed monitor alarms automatically resets when the nurse leaves the bed

APPLICATIONS
- Hospitals
- Aged Care Facilities
- Nursing Homes
- High Care
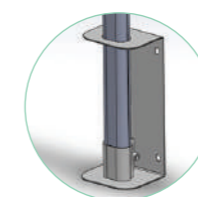

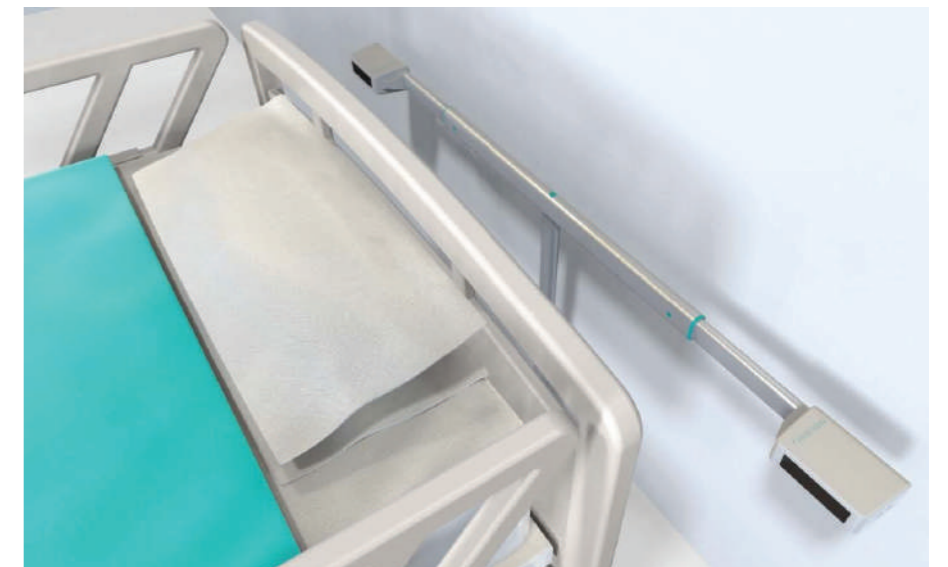

2 YEARS WARRANTY

Wall Mount Bracket (BEA007274)

Trolleys and Carts

Medical trolleys and carts are invaluable items on hospital wards. Ideal for transporting a wide range of necessary items, they provide many benefits, such as portable storage and convenient surface space. They also help staff safety move multiple items at one, saving time and reducing risk.

The Aidacare range of hospital trolleys and carts is diverse and can cater to the many different needs of medical and clinical facilities. Our selection includes utility, dressing and instrument trolleys as well as carts that are ideal for dispensing medications and laundry trolleys. In addition, we also offer a range of patient trolleys, which are ideal for safely and easily transporting patients from one room, ward or area to another.

All of our trolleys and carts are durable and designed to withstand the demands of a hospital setting.

Treatment Chairs

In hospitals and medical facilities, treatments are often easier and more convenient to administer while the patient is in a chair rather than a bed.

Treatment chairs are specially designed to allow for the quick and comfortable treatment of patients. They are especially ideal for day patients and are often used for oncology/IV treatment, pathology, and ambulatory care.
At Aidacare, we stock a variety of treatment chairs to suit various hospital and clinical needs.

Designed for optimal patient comfort, our medical treatment chairs are padded and adjustable. As such, they allow patients to sit, recline or lie down for extended periods of time while receiving care. Our treatment chairs are strong and durable. They are ideal for a range of weights and are easy to clean to ensure maximum hygiene.

Examination Couches and Equipment

Examination couches, tables, and equipment, provide patients with a comfortable and safe surface to sit or lay on while being examined and treated by medical staff. The Aidacare range of exam tables and couches includes a variety of options to suit the different needs of hospitals and medical facilities.

Our selection features treatment tables, tilt tables, two- and three-section couches, electric hi lo couches, Bobath plinths and bariatric examination tables. Our examination beds are highly adjustable and configurable. As such, they allow medical professionals to easily examine and treat patients at the most ergonomic height.

All of our options are robust and durable with many also featuring lockable castors for mobility and safety. The medical examination couches also feature padding for patient comfort and support.

Workstations on Wheels

Aidacare offers three modern, state of the art ranges of Work Station on Wheels from NuboMed.

The X-Series medical carts offer lightweight, agile, and flexible mobile nursing care with modular design, on-demand modification for clinics. Both the E-Series and S-Series embody clean and simple design for smart working in patient care settings, with the E-Series being a more economical option.

The NuboMed product range integrates and works together to provide intelligent closed loop management for medication and materials for full process traceability from supplier to patient. The hardware collects real-time data while the software standardises clinical processes and the data platform integrates and analyses the information.

Closing the medication loop increases efficiency and reduces costs and provides reliable data for accountability and decision making - improving processes and leaving more time for quality patient care.

Medical Carts

NuboMed provides lightweight, agile, and flexible nursing care solutions with a modular design for clinics. Featuring smart design concepts, their workstations integrate embedded computing, wireless modules, intelligent batteries, power supply, and IoT technology. Tailored for ward rounds, nursing, monitoring, bedside treatment, medicine dispensary, and billing, NuboMed enhances staff efficiency while delivering advanced technology for optimal patient care.

T5000E Transfer Robot

NuboMed

- **Material:** The main cart is constructed from aluminium alloy, while the workstation features a white finish, crafted from high quality PC (Polycarbonate) and ABS (Acrylonitrile Butadiene Styrene) materials
- **Storage:** 4x individual medication compartments
- **Medication Compartment Size:** 419 x 299 x 326mm
- **Sensors:** 2x LiDAR sensors, 4x RGBD depth cameras (including 2x overhead)
- **Operating Time:** The cart can operate for at least 8 hours when fully charged (starting from 100% battery)
- **Automatic Recharge:** Supports automatic return to charge when the battery is low. It can detect the charging station, and once it reaches the charging location, the station will activate charging
- **Battery:** 25.2V 35Ah (Range: 21V to 29.4V) represents operational voltage of the battery at different charge levels. Battery operates at 21V when fully discharged and reaches 29.4V with full charge
- **Buttons:** The power button located at the base of the body for easy access and an emergency button is positioned above the body for emergency stop control
- **Obstacle Surmounting Ability:** Can cross ridges up to 1cm high and gaps up to 3cm wide
- **Speed:** Movement speed is adjustable, with a maximum of 1.2m/s
- **Castors:** 2x drive wheels for propulsion and 4x castor wheels

Electronic Medication Management

Offering some of the world's leading technology, the NuboMed range of cabinets is unique in that in addition to our contracted cabinets, there is a suite of products, including carts, that will enable hospitals to scale up over time and finally achieve closed loop medication administration.

Our drug safes, by CMI Safe Company, are some of Australia's leading safes and boast high quality and local design.

The NuboMed product range integrates and works together to provide intelligent closed loop management for medication and materials for full process traceability from supplier to patient. The hardware collects real-time data while the software standardises clinical processes and the data platform integrates and analyses the information.

Closing the medication loop increases efficiency and reduces costs and provides reliable data for accountability and decision making - improving processes and leaving more time for quality patient care.

M3100-F Refrigerator Medication Management Cabinet

NuboMed

Drug Safes DS1 - DS3

CMI SAFE CO

APPLICATION

Outpatient Pharmacy, Emergency Room, Pharmacy, Central Pharmacy and Clinical Ward

MEDICAL TYPES

Controlled substances, high-alert medications, high-value medications, general medications, refrigerated medications (2-8°), IV bags, boxed medications, bulk stock bottles & other items

HD Surveillance Camera

Temperature and Humidity Display

15.6" Touch Screen Monitor

Smart Colour Bin Display

- **User Interaction:** Features a 15.6" touch screen monitor with a Capacitive Fingerprint Reader, optional facial recognition (with mask recognition capability), Staff RFID card reader, Built-in monitor speaker, and a Barcode Scanner (1D/2D barcodes)
- **Cabinet Material:** The cabinet is composed of sheet metal and high-density foam insulation, sheet metal is painted matte white
- **Cabinet Control Lock:** Intelligent Lock Control; Authorised user access only by login in
- **Cabinet Lighting:** Auto lighting on/off when door is opened/closed
- **Cabinet Door:** Double-layer electrically heated tempered glass (safety shatterproof), defrost and anti-fog function
- **Smart Drawer:** Up to 5 layers of Smart Shelves for medication storage. Each steel shelf has 4x 1U1H medicine bins and an intelligent monitoring response time of 0.5s or less
- **Proximity Scanner:**
  - Recognition distance: ≤50cm
  - Recognition speed: ≤2 seconds
- **Guiding Light:** Each bin has a RGB indicator light as a guide to direct user operation

- **Smart Colour Bin Display:** The mini colour screen displays the name, specification, and instructions if available
- **Temperature and Humidity Monitoring System:** Smart Real-time Detection of Cabinet Temperature and Humidity along with a digitalised LED panel display on the cabinet
- **Temperature and Humidity Alarm:** Smart detection of temperature and humidity with auto alarm if exceeding the range

- **Durable Build:** Constructed from durable 10mm steel, these models are designed with security and functionality in mind. Each unit features robust retractable locking bolt work for enhanced safety and is finished in a sleek silver grey
- **Anchoring:** Includes a total of eight 16mm bolt holes for secure anchoring (four located at the base and four at the back)
- **Adjustable Storage:** Internal shelving is fully adjustable, allowing customised storage solutions
- **Door Swing Direction:** Each safe comes with standard right hand, or optional left hand opening

- **Locking Options:** Multiple locking options, allowing tailored security to meet specific needs:
  - Key locking
  - Digital locking
  - Dial combination locking
  - CS-KO-RS*
- **Specify at time of order:**
  - Left or Right swinging door
  - Lock type
  - Forklift availability at delivery (DS3)

FreeSpan Gantry

prism**medical**uk
a prism**healthcare** company

- FreeSpan™ SR (straight-rail) is a flexible alternative for most overhead-lift situations
- The lift system is freestanding, and since it is not affixed to the walls or the ceiling, there are no special strength requirements for those structures
- FreeSpan™ SR is made of aluminium and many different rail lengths are available
- Choose between using Multirall™ or Likorall™ lift units
- FreeSpan™ SR is assembled without tools and is equipped with wheels, which facilitate positioning
- The wheels also make the lift system easy to move between different rooms
- FreeSpan™ is also available in a traverse-model: FreeSpan™ Traverse, a unique, freestanding system that enables lifting, and transfer of patients between many different lifting points

3M Kit includes:
- FreeSpan Side Support - Wheels + Charger plate parking bracket for sling bar
- FreeSpan Rail 3m - with Likorall Trolley - 250kg SWL
- Ceiling Hoist - Likorall 250 ES - White - 250kg SWL
- Spreader Bar - Like Universal SlingBar 450 with Quick-release Hook - 300kg SWL
- Hand Control - Likorall S, ES, 2 button (for lifting)
- Battery Charger - LikoRall and Multirall (24v/0,6 A)

Bariatric

At Aidacare we've seen an increased need for equipment with a heavier weight-bearing capacity. We've put together this guide to help our customers and their carers understand what is available from Aidacare's XXL Bariatric range. A client is deemed to be Bariatric when they weigh over 125kg and/or require a seat width greater than 50cm. This means they need to be careful when selecting medical equipment to ensure that it is appropriate and safe.

Aidacare's range of XXL Bariatric equipment is engineered to be more robust than our standard range. This increased build-quality results in more durable products that help ensure the safety and independence of our customers. Aidacare's wide range of XXL Bariatric equipment provides our customers with an extensive choice of brands and styles at an affordable price.

Modern Slavery Policy
Aidacare is committed to ethical operations and addressing modern slavery risks in compliance with the Modern Slavery Act 2018. The company prioritises human rights, assesses risks in its supply chain, and collaborates with suppliers to uphold ethical standards. Key measures include developing a Supplier Code of Conduct, conducting risk assessments, engaging with suppliers, and providing employee training. Aidacare remains dedicated to continuous improvement in combating modern slavery and ensures regular reviews and updates to its practices.

Australian Packaging Convenant Organisation (APCO)
Aidacare is committed to meeting APCO obligations by minimising packaging's environmental impact. Key initiatives include using recyclable materials, enhancing recycling programs, and educating stakeholders on best practices. Continuous improvement ensures alignment with APCO goals and sustainable operations.
