REHAB RX AND ELEVATING LEGRESTS UPDATE!

Due to ongoing feedback surrounding issues with function and quality, we have taken the decision to standardise the Elevating Legrests on our Rehab RS & RX Wheelchairs.

From July shipments, all Rehab RX Wheelchairs will come standard with Steel Elevating Legrests, replacing the Aluminium Articulating version.

Rehab RS Wheelchairs will continue to come standard with the Steel Elevating Legrests.

These steel leg rests have also been improved with additional soft knee pads for improved user comfort.

IMPROVED FEATURES

- o Articulating Leg Rests – **DISCONTINUED**
 - o WCA848160, WCA848170, WCA848180, WCA848190, WCA848190, WCA848200, WCA848210
- o Elevating Leg Rests – addition of soft knee pads to cover exposed bolts (also updated on wheelchairs with elevating leg rests as standard)
 - o WCA848100, WCA848110, WCA848120, WCA848130, WCA848140, WCA848150
- o Rehab RX wheelchairs – steel elevating leg rests (with soft knee pads) provided as standard instead of the aluminium articulating leg rests
