ASPIRE AIR LIFT CHAIR – BACKREST ACTUATOR UPDATE!

It has been well documented by service teams that there have been instances of issues with the Backrest Actuator in Aspire Dual Action Recliners. When a larger user (over 100kg) uses the chair, there is potential for the backrest to recline under its own weight. An improved backrest actuator has been designed to prevent this issue for all users.

DESCRIPTION

- o Chairs with this issue in Quarantine bins have mostly been credited by Pride
- o For all chairs with this issue going forward, replacement actuators are in stock and can be supplied free under warranty, Code: GSP400956
- o Replacement actuators are available under this code ex Moorebank warehouse
- o All production chairs from September onwards will be fitted with this new actuator as standard
