

TabTimer™ Orientation Clocks

Because knowing the moment matters

TabTimer Orientation Clocks help reduce confusion and anxiety by clearly displaying the full day, time, and date in words and numerals, making it easier to stay oriented throughout the day.

Ideal for older adults, people living with dementia, or anyone needing support with memory and daily routines, the high-contrast display is easy to read at a glance. Multiple viewing modes and optional visual and audible reminders support routines and medicine administration.

Selected models include a talking function and multi-language options, while lockable settings prevent accidental changes. With simple controls and flexible placement, these clocks can be used on a tabletop or wall-mounted, providing a practical, reassuring solution for everyday use.
