www.aidacare.com.au
The Australian made BariScale is engineered using hospital grade stainless steel and features a 400kg capacity.

Finally there is a bariatric scale system with the durability and mobility to meet the emerging needs of hospitals and facilities with heavy patients.

**DIGITAL**
Advanced digital display with battery and power pack

**HYGIENIC**
Stainless steel handrails for easy cleaning and sanitising and powder coated weigh pan for durability

**ACCESS**
Open front design and robust handrails allow for the largest patients or residents to safely access the platform

**PORTABLE**
Easily transported using the durable nylon castors and hand rails. The scale can be centrally stored and wheeled to the bedside or chair of the patient or resident

**STABILITY**
Base plate has been designed to minimise tripping hazards and increased accessibility with it’s super low clearance (38mm) and tapered sides

**ACCURATE**
4 x high quality industrial load cells provide precision weight readings up to 400kg
