Alerta Detect Infrared System

**KEY FEATURES AND BENEFITS**

- Infrared beam senses when a patient leaves their bed, alerting carers to minimise potential falls risk
- Can be used as a standalone system (sensor & receiver) to create an alarm within the room or directly placed into nurse call system (sensor only)
- Wireless plug and play ensures carer can quickly set up and operate with ease
- System includes: Sensor & Receiver, Stereo & Mono Nurse Call Cables
- Wireless solution that removes excess cables and provides a streamline falls prevention solution
- Large sensor range ensures all types of room configurations are covered
- Mains power cable is available as an optional accessory & batteries are not included

Supplied in a kit with Stereo and Mono cables suitable for most Australian Nurse Call Systems
Accessories & Plug Identification

Most nurse call systems take one of the following plug types:

**MONO PLUG**

**STEREO PLUG**

Mono and Stereo cables are the most common connection types in nurse call systems in Australia. Alerta alarm systems are supplied with both mono and stereo cables when purchased as a system, to ensure there is no delay upon installation.

If you require assistance identifying your plug connection type, if you have a plug connection that is different to these, please contact sales@aidacare.com.au to discuss options.
