Orientation Signs

These signs can provide an effective means to assist people who have difficulty navigating their environment. Most effective signage is large, with bright, contrasting colours that feature words and symbols. Suitable for people with dementia who are becoming disorientated. Signage should be placed at eye height and preferably on the door it relates to. Available in Small 200mm, Medium 300mm and Large 400mm wide. Adhesive back.

Dementia care

Dementia can happen to anybody, but the risk increases with age. It affects thinking, behaviour and the ability to perform everyday tasks. Some early signs of dementia include progressive and frequent memory loss, confusion, apathy and withdrawal. Safety within the home is an important factor to consider when caring for a person with dementia. The home environment should help them know where they are and to find where they want to go. This can be done with large orientation signs and using colour contrast to highlight important items or areas in the home.

Aidacare’s range of dementia care products aim to promote safety in the home for your loved ones.
