EVACUATION SHEET

Designed for the emergency evacuation of the non-ambulant person, the Aidacare LIFECOMFORT Evacuation Sheet helps rescue teams, carers or nurses to slide the mattress and resident along any floor surface or even downstairs, increasing resident safety and preventing injury to staff.

- Fits discreetly underneath the resident’s mattress
- Allows bed making to occur as normal
- Remains readily accessible in case of emergency evacuation
- Is Fire Retardant and Highly Durable
- Low Friction Surface
- Suitable For Use by One or Two Carers
- Maximum User Weight of 300kg

1 Year Warranty
EVACUATION SHEET

Corner Straps
Keeps the Evacuation Sheet in position

Cross Straps
Secured over the resident & mattress (covered by protective velcro cover)

Pulling Straps
Located at head & foot-ends

EASY INSTALLATION

1. Release the Cross Straps and buckle them over the resident. A pillow may be placed under the Cross Straps, at the resident’s chest and/or legs, for comfort.
2. Pull the Cross Straps tightly to secure the resident and their bed linen prior to evacuation.
3. Lower the mattress and resident carefully to the ground, then use the Pulling Straps to pull and slide the resident to safety.
4. Before unbuckling the Cross Straps, release the tension first to prevent the Cross Straps snapping back.

Note: One carer should be at the head-end and another at the foot-end. If there is only one carer available, evacuate the resident using the Pulling Strap at the head-end of the mattress.
