The Phoenix™ is the most supportive and functional of the Seating Matters chairs and is available in both adult and childrens sizes.

Designed to give maximum support to the upper body through lateral and head supports. The Phoenix™ will also adapt to the changing needs of a person being rehabilitated or meet the long term needs of a progressive condition. The unique adjustability allows the Phoenix™ to be used with individuals of different dimensions and with varying needs which is ideal for use in acute wards or changing environments.

The adjustable lateral, shoulder and head supports can conform to the person’s individual posture and position with fast and easy adjustments. With tilt in space and adjustable components. The Phoenix™ will meet a range of individual support needs, sizes and levels of mobility making it ideal for multiple users. Used in rehabilitation settings, it can assist in the development and maintenance of independence or for those with progressive conditions; it can provide additional support as necessary.

The Phoenix™ is effective for adults with the following disabilities and conditions:
- Cerebral palsy
- Spina bifida
- Spinal cord injury
- Parkinson’s disease
- Motor neurone disease
- Stroke
- Multiple sclerosis
- Alzheimers disease
- Advanced dementia
- Osteoporosis

The Phoenix™ is effective in seating clients with the following postural and medical conditions:
- Pressure ulcers
- Reduced upper body tone
- Kyphosis
- Scoliosis
- Muscle contractures
- Oedema

A simple to operate and stylish chair which is designed to improve and maximise comfort as well as postural support and pressure management.

With its adaptability and effortless adjustability the Sorrento™ lends itself easily to multi-user environments where the seating needs differ between users. The Sorrento™ can be readjusted to suit the needs of a new user meaning their comfort, posture and pressure management remain uncompromised.

Tilt in space can be used to improve posture and redistribute pressure. This can also be converted to include forward forward tilt for rehabilitation or in self-transferring situations. The adjustable back angle recline will accommodate users with limited hip flexion and when used in combination with tilt in space it can prevent sliding from the chair.

Optional lateral supports and supportive pillows can help to maintain or improve posture and facilitate functional ability in activities of daily living such as eating and communicating. The correct use of these features and accessories can also reduce common problems such as falling to the side when seated.

The Sorrento™ is effective for adults with the following disabilities and conditions:
- Cerebral palsy
- Spinal cord injury
- Head injury
- Stroke
- Multiple sclerosis
- Parkinson’s disease
- Motor neurone disease
- Dementia
- Alzheimer’s disease

The Sorrento™ is effective in seating clients with the following postural and medical conditions:
- Pressure ulcers
- Kyphosis
- Scoliosis
- Lordosis
- Joint contractures
- Oedema
- Post-operative rehabilitation needs
- Spasticity
- Low muscle tone
- Fatigue

A robust and durable chair which provides a safe and comfortable seat for those with vigorous involuntary movements while reducing the risk of falling from the chair.

The Atlanta™ is necessary to comfortably accommodate individuals who may be challenging to seat. It is a unique in that it provides security without compromising function, pressure or postural management.

The integrated tilt and recline mechanism is fundamental in positioning and will reduce the risk of sliding, pressure damage and hazardous postural tendencies like posterior pelvic tilt. The resultant deep seat and high arms is beneficial for those who may be at risk of falling from the chair.

The Atlanta™ is successfully used in the management of lower limb oedema. The variable angle leg rest used in combination with the integrated tilt and recline helps to elevate the feet higher than the heart which is the optimum position for fluid drainage. Individuals with tight hamstrings and contracted legs can also be accommodated due to the negative angle clearance underneath the seat which allows the feet to retract behind the knee without compromising the persons position in the chair.

The Atlanta™ is effective for adults with the following disabilities and conditions:

- Huntington’s disease
- Alzheimer’s disease
- Lower limb oedema
- Cellulitis
- Advanced dementia
- Parkinson’s disease
- Brain Injury

The Atlanta™ has been proven effective in seating clients with the following postural and medical conditions:

- Lower limb oedema and swelling
- Contracted legs
- Risk of pressure ulcers
- Vigorous involuntary movement
- Agitation
- Risk of falling or sliding from chairs

The Monaco™ is ideal for users with reduced mobility or sitting balance who require comfort and support without compromising independence in transfers and function.

Its unique angle adjustable seat creates an optimum and safe sitting position when adjusted posteriorly. It reduces sliding, discomfort and shear as it helps to maintain positioning of the pelvis. It can also be adjusted to assist with stand transfers and independent ambulation.

Together with the adjustable back angle recline, waterfall back, optional lateral supports and pressure management materials, a high level of positioning and pressure redistribution is achievable without compromising the function or independence of the user. The Monaco™ accommodates those with tight hamstrings as the negative angle clearance underneath the seat is designed to facilitate safe retraction of the feet behind the knees, ensuring the user’s positioning is not dangerously disrupted.

The optional variable angle leg rest can be used to elevate the lower limbs and assist in the management of oedema. The inclusion of swivel castors, push handle and sliding footplate facilitate easy mobility and access to other environments within the home or care facility.

The Monaco™ is effective for those with the following disabilities and conditions:

- Minor Stroke
- Reduced mobility
- Poor sitting balance
- Lower limb swelling and oedema
- Post operative rehab needs
- Postural problems
- Pressure management needs

The Monaco™ is effective for seating clients who:

- Continually slide from chairs
- Need assistance with mobility
- Have flexible joint contractures
- Are at risk of pressure ulcers
- Have oedema or swelling in the lower limbs
- Have tight hamstrings
- Waterfall back
- Pressure management materials
- High arms
- Angle adjustable seat
- Seat depth adjustment
- Adjustable seat height (14-20in)
- Swivel castors
- Sliding footplate
- Push handle
- Back angle recline

The Milano™ tilt in space chair is designed as a simple, adjustable and affordable care chair. It gives support, comfort and pressure management to patients who have low to medium support needs and those who still maintain a degree of mobility. If a person’s needs change in future, the Milano™ can give more support as time goes on. The Milano™ is designed for:

- Home care.
- Care facilities.
- Acute care.
- Contracts.
- Equipment loan stores.
- Rentals.

Its effortless adjustability and ease of use means that the Milano™ can be ordered online or over the phone and easily set up to suit the users’ needs. A range of accessories are available.
